

AARON GILLIES

FULL-STACK DEVELOPER

Employment

Wakefern Food Corporation
Retail Department Manager

Syracuse, NY
Sept. 2014 to May 2019

- Managed a team of 5-7 team members daily by assigning work, following up on assigned work.
- Ensured the department met quarterly/annual sales and loss goals by maintaining accurate product stock levels.
- Interacted daily with customers to ensure the highest level of customer service was maintained at all times.
- Worked to execute all corporate initiatives on ways to increase sales while reducing product loss.

Projects

One line a day - React | JavaScript | CSS | Node | Express

Oct. 2019 to Oct. 2019

- Worked with a team of full-stack developers to deliver a user-friendly note-taking web application in one week with a smooth and attractive user interface.
- Able to create, update, or delete notes with ease.
- Responsible for building a responsive and accessible landing page, and collaborating with other front end developers/UX designers on the team to make sure that the design and user experience were consistent throughout the entire application.

Chef Portfolio - React | JavaScript | MaterialUI | Node | Express

Jan. 2020 to Jan. 2020

- Chef Portfolio is an application where users can easily create an account and post their recipes to share with others. These recipes can be shared with other users or guests who visit the site looking for recipes.
- Worked as lead react engineer with a team of three other full-stack developers to plan and deliver the application in one week to designated specification, and on time.
- Collaborated with the back-end engineer often throughout the project to ensure seamless integration with the server/database.

Kansha Rewards - React | JavaScript | SASS | Node | Express

Feb. 2020 to Apr. 2020

- Kansha Rewards is a peer to peer recognition application designed to increase employee engagement and reduce voluntary employee turnover.
- Worked on a team of seven full-stack developers, and one UX designer to plan and deliver a full-stack production ready application over the course of two months.
- Refactored the entire user onboarding process and helped plan and build the bulk user upload feature which allows new users to upload potentially hundreds of users at once to their organization's account via a CSV file.
- Met weekly with product manager and engineering manager to discuss progress or blockers. Also met weekly with product stakeholder to discuss potential new features, design changes, etc.
- Participated in code reviews with project lead, as well as reviewed code from other team members to ensure code quality was consistent and met standards.

Education

Lambda School

Full Stack Software Development

Sept. 2019 to Current

- Lambda School is a 9+ month Computer Science & Software Engineering Academy that provides an immersive hands-on curriculum with a focus on computer science, and full stack web development.
