PROJECTS

Kansha Rewards - Full Stack Developer Feb - Apr 2020

React | JavaScript | SASS | Node | Express

- Peer to peer workplace recognition application
- Refactored the entire user onboarding process and built the bulk user upload feature allowing the organization administrator to upload users via a CSV file
- Refactored application styling from MaterialUI to SASS
- Built multiple dynamic components allowing the organization administrator to manage teams resulting in usability scores greater than 95% from user surveys that were conducted bi-weekly

Chef Portfolio - Front End Developer January 2020

React | Redux | JavaScript | Material-UI | Node | Express

- Recipe sharing application allowing users to post and view their favorite recipes
- Planned and built the user authentication flow as well as the application's state management using Redux
- Collaborated with the back-end engineer often throughout the project to ensure seamless integration with the server/database

One Line a Day - Front End Developer October 2019

React | JavaScript | CSS | Node | Express

- Worked with a team of full stack developers to deliver a user-friendly note-taking web application in one week
- Built a responsive and accessible landing page using HTML/CSS, and collaborated with other front-end developers ensuring design and user experience were consistent throughout the application

Employment

Wakefern Food Corporation - Department Manager

Syracuse, NY September 2014 - May 2019

- Managed a team of 5-7 team members daily by assigning work and following up on assigned work
- Implemented product loss control strategies that reduced average weekly product loss from 8% to 3%
- Reviewed employee performance frequently to identify potential fit for promotions or growth within the company

EDUCATION

Lambda School - Remote

Full Stack Web Development & Computer Science
September 2019 - July 2020
